

Institute Industry Initiative (III) Report —2015 - 2020

The III program was initiated with the objective to bridge the gap between industry and academia. The program provides the required skills to students for placement in the pharmaceutical industry. It enables the students to perceive the diverse career opportunities. Experts from various industrial sectors were invited to address on the career opportunities and counselling to the final year B. Pharm, Pharm D and M. Pharm students.

The sessions were scheduled well in advance before commencement of the academic year by the program co-ordinator. Twenty programs have been organised during the last five years (2015-2020) as lectures and interactive sessions. On an average, the III cell had conducted 4 to 5 sessions per year. Every year around 200 students were benefitted through this program. Sessions on entrepreneurship were also organised.

During every session the students are encouraged to have direct discussion with the industry experts. They have discussed about the knowledge and skill set required for the industry so that the students can learn them. They have discussed the important facets of the current trends in pharmaceutical sector in order to retain competitive advantage need to continuously monitor all aspects of knowledge management with regard to the R&D, manufacturing process and clinical research. It mainly aimed to boost the students towards the Technological change.

GOWTHAM DHAMOTHARASAMY

Gowtham Dhamotharasamy is a Social-Entrepreneur, Professional Speaker, Wealth Coach and an Independent Financial Advisor. He is specialized in training and consulting for individuals, institutions, organisations on personal finance space. He is also an Authorized Person (AP) for Zerodha, the leading stock brokerage firm in India.

Being an Engineer and coming from business background, he had interests in financial operations and hence pursued Master in Business Administration (Finance) from PSG Institute of Management. He had an in-depth learning on various financial instruments and found the wide gap existing between their real purpose and how they are mis-sold. Thus started was financial planning awareness programs to earning fraternity, who strive to take their life to next level but fail due to the poorly chosen financial instruments.

He is a certified mutual fund advisor and a Millionaire Mind Intensive attendee and shares insights on personal finance. Currently having a client base of more than 700 members from all over India, he is supporting them to choose the right financial instrument, be it savings, insurance or investment to meet their goals. They range from freshers starting their career, members of middle management, CEOs and retirees also. His activities include personal financial planning awareness sessions, wealth management sessions to corporate employees of organisations, institutions and business owners. This focusses on the basic insights of financial instruments to plan their spends and asset allocation to finally become financially independent.

He is an active member of Young Entrepreneur School, Coimbatore Startups Circle, Coimbatore Management Association, Kovai Investors' Association (life time member) and KBN.

He is currently a visiting faculty at KCT Business School, Coimbatore with expertise in subjects like wealth management, mutual funds etc. He also gives guest lectures to various other B Schools and colleges on topics related to capital markets and their functioning.

LIFE SCIENCES STARTUP

It's a Marathon, not a Sprint

Any successful entrepreneur needs to begin with the right idea and a crystal clear vision of the targeted outcome.

What is needed

- heavy research
- sound financials
- a determination to push through inevitable barriers

Manage Risk with Experience

After many years working in the pharma industry globally, one learns to cope with the many inherent risks posed developing and commercialising medicines.

It is a business where more than nine out of 10 drugs typically fail to reach the market. Once in the market, medicines can still fail, due to pricing pressures or poor prescriber uptake.

So we are building a business around products that have a high probability of failure, and a very small probability of meaningful success.

Case study no. 1. (collaborative)

A large-pharma executive, with no specific scientific or clinical training or experience, driven by a desire to be an entrepreneur, met a scientist through a social network contact and learned of his novel invention. This executive, wanting to break off from his large company and be involved in entrepreneurial activity, built a company around this technology, which enables the development and manufacture of biotherapeutic products. The core idea came from the scientist, but the idea subsequently evolved substantially around that core as the company went through the early formation process.

Case study no. 2. (unmet need)

A sales executive for a medical health care provider, trained as a physician, came to understand the diagnostic industry through conversations with his customers. After identifying an unmet need, he used internet research, publications and his social network to assess the need for a new product. Based on the positive feedback, he founded a diagnostics company.

Case study no. 3. (Venturing in right place)

Working as a management consultant in a non-capitalist economy, an entrepreneur met a scientist who told him about his ideas and research findings. The consultant suggested founding a biotech company based on the scientist's ideas. They made several attempts to start a biotech venture and found that there was a serious lack of understanding of funding such startups in their country. The entrepreneur and scientist finally managed to come to the US and start their own biotech business. They also set up a subsidiary in their home country where the bulk of research and development work is being done. The company is now funded by US venture capital and moving forward in development.

Case study no. 4. (Identifying right opportunity)

A person with a bachelor's degree in biology took a technical training course at a local medical research center that was taught by a scientist who had been doing R&D for diagnostic tests. The student realized the opportunity for a business in providing R&D diagnostic testing for drug development and incorporated a company with technology licensed from the medical research center. The company has over a decade of successful operation now.

Case study no. 5. (Managing revenue when main business takes time to get established)

An investment banker started a medical device distribution business and soon found that the main product line was going to become obsolete. The company survived financially by continuing the distribution business, while the banker and his partners developed a new technology for a diagnostic process service. Now they are marketing the new technology and the resulting products themselves.

Case study no. 6. (Business utilizing emerging technology)

Over 15 years ago, a scientifically minded businessperson read about genetic testing in a magazine and thought that the new technology would make a great business opportunity. His enthusiasm convinced his spouse to get involved, too. He started a business and it slowly evolved to a niche high-tech service. After his death, his spouse took over and has run the company successfully for over 8 years now.

Case study no. 7. (Partnership)

A physician treating patients with chronic diseases was not satisfied with existing therapies and thought he would venture out to form his own company and develop a therapy for the clinical need he had identified. He found a business-oriented person to partner with and together they created a business plan, raised angel investment and licensed in some key technologies from universities that could address these diseases. A partnership with another pharma/biotech company has been established to bring in applicable technologies, fund development and to achieve rapid progress without investing heavily in basic R&D internally.

A successful beginning for a life sciences startup would be

- to build a team of people bringing all aspects of these two distinct approaches together as soon as possible
- all the stakeholders in the new venture benefit from the best marriage of business and technology

Nandhi, Sreeraman <sreeraman.nandhi@merck.com> 21:26 (12 hours ago)

to me

Sir,

25/1/17
To Arun Narendran
ESF Coordinator

Greetings to you and thank you for giving me this wonderful opportunity, indeed the hospitality rendered by all of you was wonderful, Further to add the students were wonderful audience, they were very attentive throughout the program many of them participated very well.

Today's presentation topic "Managing You" is the first part and in this series related to today's topic the next part is the "Level Ten Game – The Gandhi In You" which is focused more towards building the energy level and motivation level of the participants.

Observations:

1. Students were very attentive and showed their presence throughout the presentation.
2. Their thought process while trying to answer the questions is very good.
3. They had encouraged the presenter throughout, by clapping, laughing for the jokes cracked, expressing their emotions for the animations put up in the Power points etc.
4. When invited to the stage as volunteer to contribute even though they had some inhibition in the beginning, during the later part they came on their own when called, in fact when I had asked their goal during the end of the presentation many of them had expressed their ambition, goal, interest.
5. I could see the smile with all the students throughout the presentation, Because I believe this is what drives the presenter to give his best.

Area to be focused;

1. Industry knowledge.

Looking forward to be associated for such programs in future also.

Regards.

Sreeraman .N.

Dr. T. Jothimani, M.A., Ph.D.
Assistant Professor
PSG College of Arts and Science
Coimbatore-641 014

Dear Dr. Jothimani,

PSG College of Pharmacy is one of the several Institutions nurtured by PSG and Sons' Charities engaged in nation building through education for the past 87 years.

We have embarked a program to bring awareness to the pharmacy graduates/post-graduates on the job opportunities and the current job trends. This is aimed at showing the multiple fields in which aspirants with a pharmacy background can initiate their career and grow.

In this program, we invite experts from Industry across different sectors like, pharmaceuticals, clinical trial organisations, Intellectual property management, data mining, medical coding, medical writing, medical transcription, clinical pharmacy, pharmacy practice, marketing and business development, biotechnology, Nutraceuticals, food and beverage and others. Through monthly awareness meeting spread over the entire year, we invite Industry experts and arrange for an interactive session with the students. This is aimed at educating the students on the requirements to enter into Industry and also know what the Industry expects from the job seeker. Depending on the student's interest, he/she may take a short training program or initiate acquiring additional knowledge on a topic of his/her interest.

In this regard it is our pleasure to invite you for a session on **"Psychometric Assessment Enhancing Career Skills"**, with our B. Pharm and Pharm.D students. Kindly accept our invitation and give your consent for the interactive session on 27th Feb. 2015 at 1.30 PM.

Looking forward to meeting you and having a good interaction with our students.

Thanking you,

Yours Sincerely,

Dr. M. Ramanathan,
Principal
PSG College of Pharmacy
Peelamedu, Coimbatore-4.

PSG COLLEGE OF PHARMACY

22.06.2015

CIRCULAR

We have arranged for a talk through Institute Industry Initiative, Dr. Rajamani, Professor and Head, Medicinal and Aromatic Plants, TNAU Coimbatore, will give talk on the topic "Research career – motivating young minds", on 26th June 2015 at 2.30 pm.

All the final year and III year B.Pharm students are requested to attend.

Dr. M. RAMANATHAN
Principal

Date : 03.03.2017
