

Name and Features of the ILMS Software :

Library Information System (LIS) at PSG IMS&R, The software that manages and stores books information electronically according to students needs. The system helps both students and library manager to keep a constant track of all the books available in the library. It allows both the admin and the student to search for the desired book. The Software is used to Add Book Category, Add Book Title, Author, ISBN No. Publisher Details and Purchase Details. The software helps the users to Search Book, Issue Book, Request Book, Add Book Location, to view All Issued Books, All Requested Books, Books Over due date, Return Book, SMS to books not Submitted, Pending Fine Report

Modules:

- **Admin login:** Admin is the one who administers the system by adding or removing books into and from the system respectively.
- **User login:** Students have to register themselves into the system to create an account. After registering successfully, they can then login into the system by entering their student id number and their respective passwords
- **Add and Update Books:** The admin can add books to the system by entering the details of the books and can even update the details.
- **Search option:** Admin and Students can even search for books by entering the OPAC
- **View Order-**The admin can view order for the books.
- **Calculate Fine-** The student can view the issue and expiry date for the book issued and can even calculate fine.
