Tough Situations Build Strong People!

Life keeps bombarding us with challenges. It constantly presents us with various situations and circumstances. Some may be positive and give happiness but some may have negative impacts on us. Those are the situations we need to handle right, to seek positivity even in the dark. No matter how conscious we are, tough situations are inevitable. Every one of us encounter it, but how we face it differs.

It is during those tough times that our mental strength will be tested. When mental strength lacks, it will automatically push us to dependence. We search for helping hands and saviors to bring us out of the situation. But unfortunately, dependence creates expectations and expectations lead to disappointments. We start believing that, we cannot handle the situation alone and we need someone's help. When the help is denied, it breaks us more. The bitter truth is that, tough situations reveal true people. Not all the ones who smile at us in their needs, would stay when we need them. Not all the ones who claim to be our best friends, would stay close in worst situations. Its a good thing if there are any. But, it's a very good thing if there isn't anyone who stays. Though initially it may hurt, after few expectations and disappointments, we will get used to it and also we will be compelled to try handling our problems alone, to prove our efficiency.

As Albert Einstein's quote says, "I am thankful to all those who said no to me. Its because of them, I did it myself", once we accept the reality, the stage turns from 'expecting' phase to 'exploring' phase. Exploring all that we could do by ourselves. We start fighting our battles, figuring out all possible ways to overcome hurdles, flourishing our hidden potentials and start testing the extremities we could handle. All it takes is, accepting the reality, managing our thoughts, feelings and behavior and focusing more on ourselves.

To gain strength: Make sure to get rid of all the self-limiting beliefs which derail you from your goals; Do not wait for an external motivation to run in the race. Self motivate to face any obstacles; Believe yourself to be your most trusted friend and your only helper; Though, at times, pessimistic thoughts linger upon, make sure to stamp on it and remind yourself of how capable you are.

Paying attention on the choices you make on how to think, how to respond, how to behave and how to tackle, will help you emerge from your struggles even stronger than before. Tough situations make people more confident, more independent, more self-sustaining, more capable and stronger than ever.

Hope

Sometimes darkness was deep and seem to shallow all our hopes. Sometimes its hard keeping up with the inner faith during the most critical times. But hope not only gives you the strength to overcome a pain, but it also makes the journey for the future easier. Someone rightly said "learn from yesterday, live for today and hope for tomorrow". Hope is the door to all our unreal imagination. Many of us couldn't even live a life of peace without having hope deep inside the heart. A small example is we set the morning alarm in the hope to face yet another challenging day. It gives a positive mind power. It is more pandemic than anything else.

Let's not forget this that hope is real and all we can do is to see it and in difficult times let's hope for a better life and a better world.

Locking down the Lockdown

A hiatus or a halt, we had brought upon us? A folly or a fault, we had committed?

Regretting or reflecting? behind those closed doors, Reasoning or realising? about the damage we were able to do.

love and liability, to each other we did display, condolences and catastrophe, was the price we had to pay.

Envy and enmity, between our own kind? isolation in iniquity, the only solution we did find.

Brave and bounded, we had to become, worried and wounded, but we did not succumb. Glorious and gallant, was the fire in our heart, Tough but triumphant, was the fight we had fought.

Traumatic and treacherous, was the phase we had to face, Blissful and beautiful, were the following days.

Respect and reconciliation, our mother nature has gained, compassion and consideration, are qualities we have obtained.

Forgetful and foolhardy, never should we, Succour and service, will forever our motto be!

Duty is God: Work is Worship

Each and every one has their own duty. Duty stands first then comes god. Duty makes god to protect us and remove obstacles in our path.

Now let us see A incident happened and written in Bagavatha purana. Once a prince priya vardhan decided to meet load Brahma he decided to mediate on forest and worship him to see him finally. So he took his horse and move towards forest by leaving his country. Meanwhile Lord Brahma appeared on sky and said him duty is first no use of mediating on me beyond doing your duty. And also control pride, greed, lust, envy, anger, religionism. A man who do his duty is never been harmed. So guide you people and do your duty I will come to you. After hearing this priya vardhan changed him and stood on Lord Brahma advice and guided his people. From this incident we should learn that duty is god and work is worship. Same was said my swami Vivekananda that

"Every duty is holy, and devotion to duty is the highest form of the worship of God"

A figure in the mirror Staring through my eyes Made of imperfections and errors Wearing a smile as disguise

Perfectly imperfect Reflectionthat I see Ample room to mend and correct Sculpting the me I want to be

In the mirror is a reflection Not just a mere image Puzzle pieces' combination The past's leverage

My will to be me Or who I want to become A reflection is all I need To see my action's outcome

Circumstances poignant or a hustle That have come my way Is now a piece of my puzzle That has made me what I am today

Reflecting on my pathway
Through the smile and frown
Reflection on display
Seeing the new me I've become.

The Grass is not always Greener on the other side!

No matter how amazing one's life is, people never seem to be satisfied with what they have. Don't we always think about things, people or places that seem better than what we actually have?

Social media has such a negative impact on our mental health. On your Instagram, you might see that most of your friends' life is better and more happening than yours. Your friends hanging out at fancy restaurants, getting a better job... all of this, makes you want to portray to the world, that your life is in now way less exorbitant. But are you really as happy as you portray it to be? Our generation finds it hard to handle even the little failures in life and cringes about issues that do not matter in the path towards success. While in reality, our life is pretty good. While we have the privilege to attend college everyday, there are 70 million children who do not have access to basic education. Unless you are stuck in Syria's warzone or you are one among the 800 million people worldwide who do not have enough food, trust me, YOU ARE LUCKY!

Do not constantly look for better things. Do not be in an endless quest to find happiness. Try to find happiness in the little things of life. Instead of believing that the grass is greener on the other side, nuture the grass you already have. After all, the grass is greenest where it is watered.

Power of H Smile

A Smile can make you bloom, and take away your fume.

A Smile can do a wonder, and make you not to thunder.

A Smile can win many a heart, and bring together those who are apart.

A Smile can add to your charm, and will do you no harm.

A Smile can turn your foes to friends, and make others do your enhands.

A Smile can add life to your years, and also years to your life.
