Note

The above bar graph depicts the overall class performance with respect to the Threshold % for individual Program Outcomes ((POs)). The Attainment % for respective columns is calculated using the below formula.

For Attainment based on Threshold method % = X / Y

Where,

X = Sum of all the Course Outcomes(COs) Threshold based Attainment % mapped to the respective PO

Y = Count of Course Outcomes(COs) mapped to respective PO

For Attainment based on Weighted Average Method % = X / Y

Where,

X = Sum of all the Course Outcomes(COs) Threshold based Attainment % * Map Level Weighted Attainment % mapped to respective PO

Y = Count of Course Outcomes(COs) mapped to respective PO
